Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control diseases without knowledge of when, where, and under what conditions cases are occurring.

UNITED STATES.

CURRENT STATE SUMMARIES.

California.

From the California State Board of Health, telegram dated December 11, 1917:

Five cases poliomyelitis reported last week, one each in San Joaquin County, Butte County, San Francisco, Tropico, and Yuba city. Four cases epidemic cerebrospinal meningitis, 2 in Los Angeles city and 2 in Los Angeles County. Three cases smallpox, 1 each in San Francisco, Los Angeles, and Kern County. Typhoid shows increase, 27 cases last week, 12 in San Francisco, only 4 of which local in origin. Reporting venereal disesaes stimulated; 267 gonorrhea reported last week.

Reported by mail for the preceding week (ending Dec. 1):

Cerebrospinal meningitis	2	Pneumonia	77
Chicken pox	104	Poliomyelitis	3
Diphtheria	69	Scarlet fever	88
Dysentery	1	Smallpox	11
Erysipelas	5	Syphilis	50
German measles	51	Tetanus	1
Gonococcus	55	Trachoma	4
Malaria	10	Tuberculosis	74
Measles	86	Typhoid fever	16
Mumps	6	Whooping cough	114

Indiana.

From the State Board of Health of Indiana, telegram dated December 10, 1917:

Scarlet-fever epidemic Angola, Bloomingdale, Decatur, Dayton, Clinton County, Trenton, Randolph County. Diphtheria epidemic Sheridan. School children ordered vaccinated, smallpox, Indianapolis, Fort Wayne, Shelbyville, Richmond, Bloomington.

Massachusetts.

From Collaborating Epidemiologist Kelley, telegram dated December 10, 1917:

Unusual prevalence diphtheria: Whately, 4; Amesbury, 6 additional; Foxboro, 14. Scarlet fever: Montague, 5 additional; Pittsfield, 6 additional; Brockton, 6; Colerain, 3. Whooping cough: Webster, 8 additional.

Minnesota.

From Collaborating Epidemiologist Bracken, telegram dated December 10, 1917:

Smallpox Ottertail County, Hobart Township, 1; Polk County, Fisher Township, 1; Granville County, Cairo Township, 4. Two cases poliomyelitis reported since December 3.

Nebraska.

From the State Board of Health of Nebraska, telegram dated December 10, 1917:

Smallpox at Pender; scarlet fever at Lyons.

South Carolina.

From Collaborating Epidemiologist Hayne, telegram dated December 10, 1917:

Measles still prevalent; infantile paralysis 2 cases.

Virginia.

From Collaborating Epidemiologist Traynham, telegram dated December 10, 1917:

Smallpox reported from Roanoke, Wise, and Tazewell Counties.

Washington.

From Collaborating Epidemiologist Tuttle, telegram dated December 10, 1917:

Two cases poliomyelitis, Seattle.
